Chelsea,

We just got this result in for [REDACTED] We still don't have the field blank (FRB) result but this is another home where drinking water (they have no filters or water softener or anything installed) is just above the 70ppt criteria and we should contact them right away to ensure that they are using bottled water or some other equivalent.

Thanks

Hi all,

I contacted all the residents we have tentative results for – I left a voicemail if no one answered. For those I did speak with, I emphasized that these were preliminary results and that they'd receive official results in the mail in a few weeks (basically I just let them know if the preliminary data were above or below the health guidance). I gave Mark's number to those with additional PFAS-related questions.

Have Chelsea contact the homeowners. Chelsea, see below and coordinate with Brent. I am having difficulty sending files from here at the moment.

Attached are the individual residence tables or preliminary results. Any results that we are waiting for are greyed out in the tables.

The following tables are complete with all data and could have Chelsea contact homeowners, do you want to have that done?

Attached is a summary of results and work so far (word document) as well as an accompanying tables. I've only included 2 example tables of the individual residence results as I am currently editing the rest of the tables to include the combined PFOS and PFOA and criteria. I wanted to get the rest of this to you in the meantime for you to review as I finish that up.

One thing to note, I don't have any knowledge of the historical wolverine samples collected from CDA010 thru 016 (with the exception of 015) as these were the additional homes and not part of Wolverine's sampling of homes with filters installed. I don't want to assume that these homes were all sampled previously by Wolverine until we confirm with

Wolverine's data. If you have other knowledge of why these homes were chosen for sampling or if they had been sampled previously we can add that to the summary.

Thanks

Thanks, let me know when you think you can get me something to look at. Maybe include the summary of our activities you sent me a couple weeks ago.

Brent,

I will need a good summary today of the data we have received, and where we can, compare it to historical Wolverine data. I need to brief my managers tomorrow

Thank you,
